Education

2020- 2023 (Expected)

Master of Science in Engineering Science; University of The Pacific

2018- 2023 (Expected)

B.S., Computer Science, Software Development Concentration; University of The Pacific

Experience

HEALSTRENGTH LLC

Spring 2018 - Summer 2018

I was both the photographer and website designer for my local gym. During this job I developed essential skills in communication as I needed to design the website in tandem with other staff, and coordinate with them to find the best times to film and photograph clients of the gym. Additionally I gained invaluable experience in web design, as this was my first attempt at creating a website from scratch, with a very specific vision in mind. The result of the work can be seen [here](#) (publish pending).

Technical Experience

Web Development

I am well versed in the development of web based applications, as well as the maintenance of said applications. As an extension of this I am able to serve as support staff in the helping of website users(such as password retrieval and explanation of operations on the website).

Languages

I have experience with:

- C/C++/C#
- HTML5/CSS3
- Java
- JavaScript
- Rust
